14 July 1986

MEMORANDUM FOR THE RECORD

SUBJECT: Panama INTERNET

I received a call from Billy Cool of COMSAT saying that he had just talked to Roger Parsons of STS and that Roger requested the Panama INTERNET electronics not be picked up on the 4th of August as requested last week. He asked that the pick-up now be arranged for the 11th of August. I requested a piece of paper from Billy concerning this as STS has been changing these dates at will and that they are slipping the whole Panama installation by almost a month. I suggested to Billy that he contact Helmo Raag concerning this delay as we, FBIS, were not happy about the 4 August pick-up and now the 11th makes it even worse.
